

AN ADEL STUDENT LED INITIATIVE

HOW ARE YOU, OCADU?

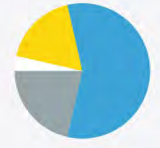

Art and Design Education Lab - Community Leadership conducted research in the fall of 2014 inviting the OCADU community to assist them in re-imagining OCADU for the 21st century.

This action was an outgrowth of our deep curiosity about our own complicity in teaching and learning at OCADU. We wanted to open the Pandora's Box and excavate the messiness. We all know that we need to dig deep and take risks in studio practice in order to push our work to stronger and richer iterations. But, how can we as educators do the same? How can we define OCADU as a community: Is it a place of/for community gathering(s)? What is its ethical grounding? What is its reason for being? How can we determine what learning means at OCAD?

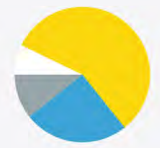

While our posters are presented as tongue-and-cheek, the data they were derived from was diverse, compelling, and often contradictory. Videos, which accompany this exhibition, provide a more storied response from members of this community.
