

**Perspectives on Design Education**  
Lecture by Dr. John Fass, PhD RCA  
Visiting Faculty from LCC  
London College of Communication

# Tangible Tools For Thinking Complexity

The tools we use to think shape the way we understand the world around us, and the opportunities for learning available to us. This talk will focus on the externalisation of complex abstractions and experiences using tangible methods. Drawing on examples from a series of participative workshops the talk will outline the rationale for developing tangible methods, show how they have been used to structure collaborative exploration, and end with suggestions for how to design tangible tools in design research.

**Wednesday 26th September**  
19.00 - Room 187 (Lambert Lounge)  
100 McCaul Street.
